gültig ab /Version: 05.02.25 / 01			

This document bindingly specifies which parameters are evaluated within which matrix based on which assessment criteria. The national and European legal provisions applicable in the Federal Republic of Germany as well as relevant specifications from communities, associations, and societies are used as the basis for assessment. The version of the regulations in force at the time of the respective assessment is always applicable. Evaluations based on customer-specific requirements are not covered by this document and are not listed.
